

One Health EJP Final School 2022: Sustainability in One Health: how can it be achieved? PROGRAMME

In 2021, the One Health High Level Expert Panel redefined One Health: "One Health is an integrated, unifying approach that aims to sustainably balance and optimise the health of people, animals and ecosystems. It recognises the health of humans, domestic and wild animals, plants, and the wider environment (including ecosystems) are closely linked and inter-dependent."

Sustainability is at the core of One Health approach. Sustainable solutions must be adopted that recognise the importance of animal welfare, biodiversity and ecosystem integrity for overall health and well-being, now and for future generations.

Monday 5th December

- | | |
|--------------------|--|
